

Welcome to Qualiexpert!

Technical rigor for confident decision-making.

**Specialized Quality & ESG consulting, grounded in
Production Engineering.**

August 12, 2026

We work with organizations that need to turn complex issues involving **quality, process and sustainability** into more reliable decisions and more integrated management, considering their context and maturity level.

Close and Collaborative Engagement

Active listening, clear communication, and respect for the organization's pace

100% Direct Senior-Level Service

Online or on-site, according to the client's needs.

Bilingual Projects — PT/EN

Project delivery and documentation in Portuguese and English.

Ethics and Integrity

Evidence-based recommendations tailored to what makes sense for the organization, without off-the-shelf solutions or conflicting commercial interests.

We understand your journey

Organizations come to us at different stages, with one need in common: **to make decisions with greater confidence.**

External pressure

Regulatory requirements, clients, and audits increase leadership exposure and demand well-founded decisions.

Proactive Planning

Growth, new contracts, or changes in scope require preparation before the need becomes urgent.

Uncertainty

When it is unclear what should be prioritized, an external perspective helps guide decisions and investments.

Evolution

Existing systems need to deliver greater predictability, integration, and consistency to support growth.

Who leads our projects

PATRICIA VASQUES, M.Sc.

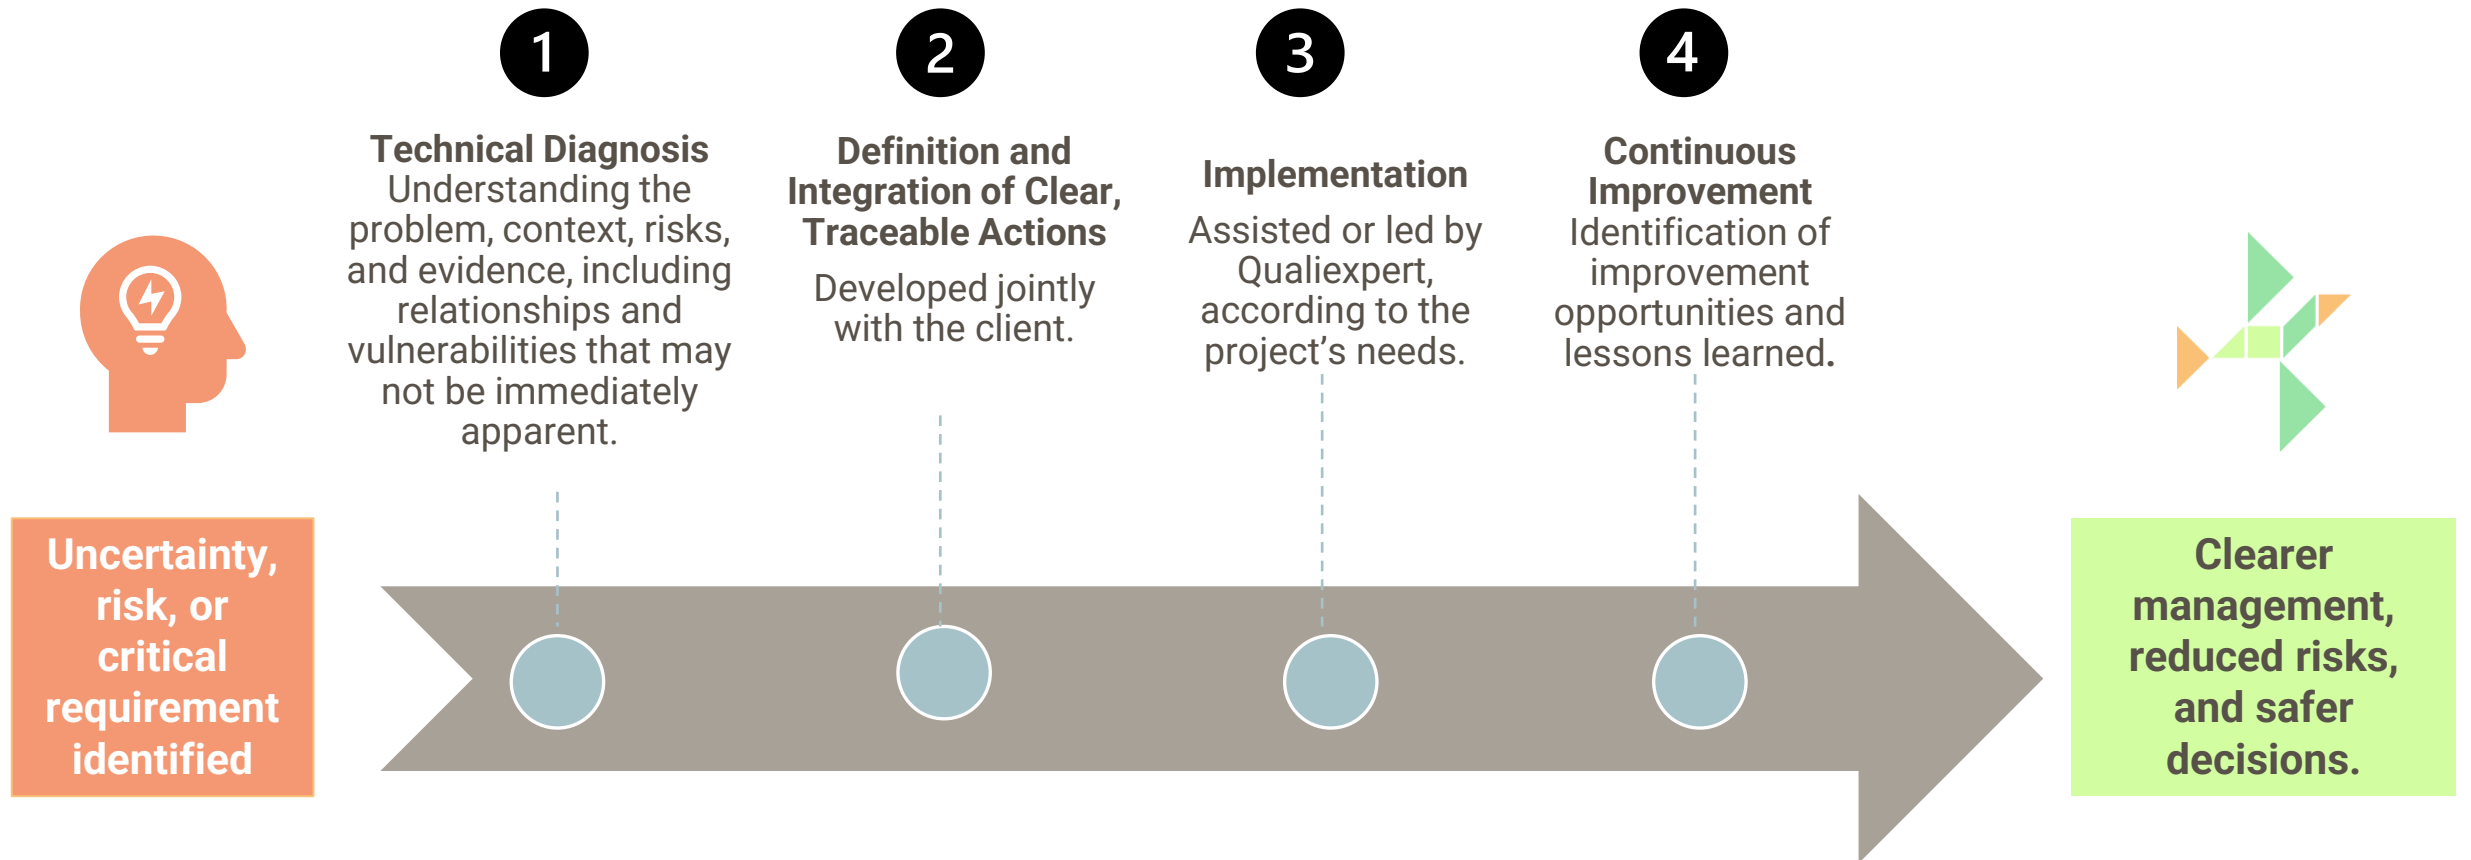

- Founder and Executive Director of Qualiexpert;
- Production Engineer with a Master's Degree in Production Engineering from Fluminense Federal University;

Qualiexpert Methodology

Services

Sustainability & ESG

Greenhouse Gas inventories and reports, sustainability reports, management systems, and support for the climate transition.

Training & Development

Quality and sustainability development through training, workshops, presentations, and executive education.

Quality & Process

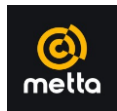

Management systems, assessments, processes, audits, performance indicators, and improvement.

Engagement Formats: Consulting projects, ongoing advisory support, audits, training, and technical and executive mentoring, according to each organization's context and needs.

Our clients and their results

Reliable and verifiable environmental information: Greenhouse Gas inventories developed for seven terminals in Brazil, with external verification, as well as sustainability reports structured for operations in Brazil, Argentina, Chile, and Peru. Partnership renewed for four years.

Clearer, standardized, traceable, and auditable processes: Process structuring and mapping projects; development and improvement of operational and quality procedures; internal audits, diagnostics, and mentoring. Direct support during third-party audits.

Teams better prepared to apply Quality Principles: In-person and online training developed according to each organization's context, maturity level, and challenges, turning quality concepts into practical workplace applications.

Every organization makes decisions. Our role is to make those decisions more reliable.

Let's discuss the risks, priorities, and key decisions your organization needs to address.
